DINNER with the D O C

Presented by Dr. Wade Lofton

Ever wish you could just sit down with your doctor over dinner sometime for not only good food, but helpful information as well?

As a part of February being National Heart Awareness Month, and Life Force Family Chiropractic (LFFC) of Savage's mission is to serve, love, educate, empower, and adjust as many people as possible today to change the world tomorrow.

"We're inviting you guys to have a healthy dinner with us!" says LFFC CEO and Founder Dr. Wade Lofton.

But perhaps more importantly, you're invited to learn about this devastating disease.

LFFC is offering an event on the topic of sudden cardiac death, weight loss, diet and stress on February 26. Free of charge to those who attend, the event will include a dinner and presentation on healthy living and the principles needed for a healthy heart.

"What natural ways can an individual take to avoid having serious long-term problems? What is the truth behind cholesterol drugs - because there's a ton of confusion. We just want to educate," Dr. Lofton says.

"We're a neurological-based facility that really specializes in impacting people's lives and getting them off of medications and healed of diseases. We have all sorts of patients who have been very successful in eliminating prescription drugs."

Dr. Lofton is passionate about the work he and his team of professionals have done, referring to a map in their lobby that indicates people from all over the United States that have come to see him for help over the years.

When speaking about it, a visibly excited Dr. Lofton hopes as many as possible attend the event. "It is our goal to save as many lives as possible."

"I always say when's the last time your doctor took you out for dinner and not only paid for it, but also educated you," Dr. Lofton says.

And who doesn't want to have 'dinner with the doc'?
